

I2C Transit

SAFETY

Whether it be children on a school bus or citizens taking public transportation each are entitled to a level of safety and security.

SECURITY

Protect both persons and property with continuous video surveillance recordings of the activities in and around the vehicle.

DETERRENCE

Cameras can help deter as well as aid in prosecution in the event of incidents of assault, vandalism and theft.

PEACE OF MIND

Know that your staff, transportation users and vehicles themselves are secure at all times and have the ability to see for yourself at any time.

I2C Transit is the complete package for automotive surveillance. Each unit includes a rugged server paired with I2C's easy to use Video Management Software (VMS).

A Remote Connectivity Package is offered as well allowing for connection via cellular (cellular card not included). This option allows you to get live camera feeds as well as retrieve video archives at any time. This upgrade also offers WiFi over 802.11n/b/g, making video retrieval from a wireless computer within range simple and convenient.

I2C Transit provides your passengers and employees with a high level of security using cutting edge IP Network camera technology.

- I2C's unique VMS (Video Management Software) allows for easy viewing and archive retrieval, even across low bandwidth connections.
- I2C Transit offers a high level of scalability. The same technology in our Transit has been in use for years in Government and Commercial surveillance applications.
- I2C Transit is a true Turn-Key Solution. The system comes preconfigured for easy installation and rapid deployment.

The system is contained within a rugged enclosure. This enclosure allows for the system to be protected while taking up minimal space. The system is powered by 12VDC for vehicle installation. The camera is a PoE enabled, IP Network camera ensuring high quality video. These cameras are enclosed in vandal resistant housings and are small enough for easy installation.

With innovation from I2C, not only are you buying a top quality product but you are also purchasing 1st class service.

System Technical Specifications

IP Cameras	Up to 3 PoE enabled, IP Network Cameras.
On-Board Video Server	Rugged On-Board Server
Cellular Data Modem / WiFi	Supports most carrier's standard USB cellular Data Modem with External Antenna Connection, 802.11 B/G/n WiFi. (Supports WEP, PA, WPA2 wireless security)
Operating Temperatures	-20 degrees to 120 degrees F
Operating Input Voltage	12VDC
